

Remarks/Arguments

A Restriction Requirement mailed May 16, 2006 indicated two inventions: I. Claims 1-5 drawn to a system and method for analyzing predetermined characteristics of a flow stream; and II. Claims 6-17 drawn to a system and method for analyzing one or more particles in a flow stream. The applicant elects invention II claims 6-17 for examination.

The Examiner objected to the drawings because reference number 312 was not disclosed in the specification. Please amend the specification on page 21, line 19, in that "212" should be -312-.

Respectfully submitted,

Dated: 06-15-06
